Electric Parameters

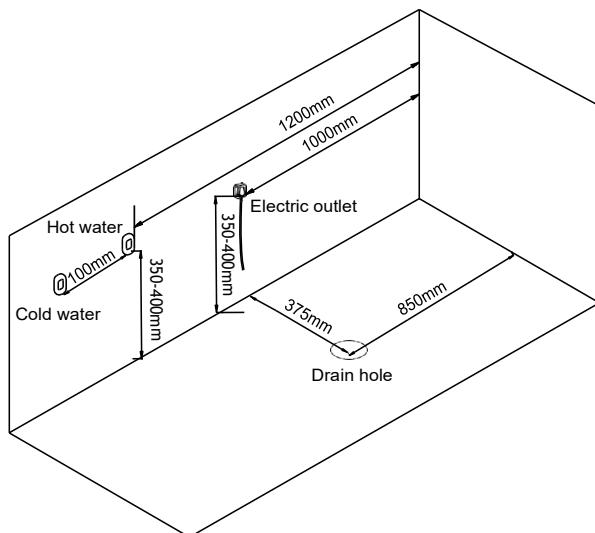

□ Rated Voltage:	220 V
□ Rated Frequency:	50Hz
□ Rated Maximum Power:	600W
□ Rated Maximum Current:	2.8A

Preparation of Connections

- (i) Due to technical advance positioning of relevant connections on the bathtub may be optimized. Literature dimensions are for reference only. Installation dimensions should be taken directly from the tub.

The following positioning of the water and electricity supply is suggested for standard operation of the bathtub.

1. All electrical connections should be made by a licensed ,locally certified electrician,In accordance with the requirements of the requirements of the national electrical codes and procedures.
2. There should be electric-leakage protector on the power supply. Power lines must be fixed ones, which are with good ground line. The section of the electrical wire should not be less than 2.5 m². The power supply appliance should be in accordance with the National Safety Standard. And connect the protective ground line on the ground line- mark of bathtub frame (The electric-leakage protector is prepared and connected by user).
3. Warning: when using electrical products, basic precautions should always be followed, including the following.
4. Danger: risk of electric shock! connect only to circuits protected by a Ground Fault Circuit Interrupter (GFCI). A GFCI is not supplied, however, we do specify its use. all known code authorities require a GFCI.

Connection Position Chart

Installation

1. Hose Connecting Way

The fittings of bathtub were already connected before shipment except faucet.

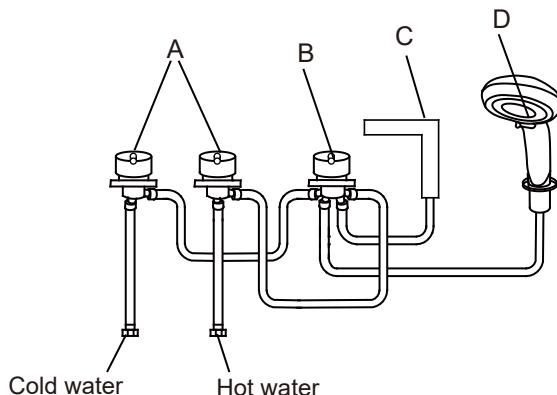

Users need to install the faucet according to the back procedures, and then connect the cold/hot water hose to the corresponding water supply tube, which should be in the shelter of the bathtub's back.

A: Water Inlet (Cold/Hot)

B: Switch of Handheld Shower and Faucet

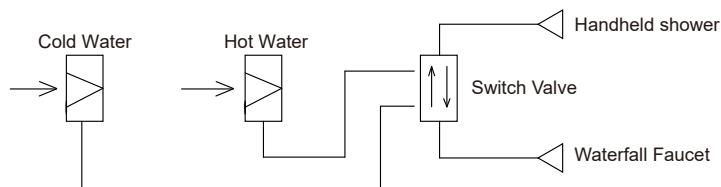

C: Waterfall Faucet

D: Handheld Shower

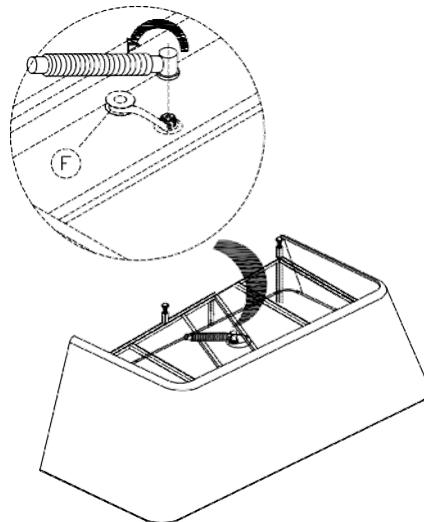

Water Inlet Faucet Connecting

2. Water Supply Chart

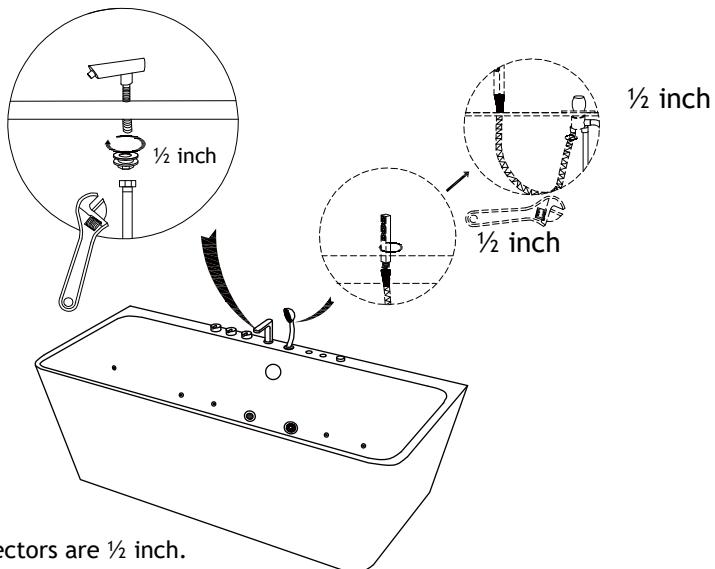

Installation

1. As the picture shows below, turn over the bathtub, wrap the drainer hole with thread PTFE tape, and then screw the drainer.

2. As the picture shows below, turn back the bathtub. Install the waterfall and hand shower, connect to the water hose.

Note: hose connectors are $\frac{1}{2}$ inch.

Installation

3. Move the bathtub to the wall corner; put the drainer into sewer and seal the drainer. Adjust the tub feet to make the bathtub horizontal. Seal the gap between the bathtub and the wall with sealant to avoid water leakage.
